

PMC Engineering (Private) Limited

PLANNING | MANAGEMENT | CONSULTING

An Aviation Fuel Storage & Fuel Systems Solutions Provider

PMC Engineering (Private) Limited and our associate partners specialise in the Design, Engineering, Procurement, Construction & Commissioning (EPCC) of Commercial & Military Aviation Fuel Systems (staging facilities, fuel farms and tankage for refined product storage) in addition to the fuel hydrant delivery refueling

The Company's management and its associated partners have an unparalleled wealth of experience in servicing the needs of our Clients on a Design and Build, (EPCC) Engineering, Procurement, Construction and Commissioning basis.

PMC Engineering (Private)

Fuel makes the world operate and we understand its long-reaching impacts. We design and oversee construction of facilities and systems that receive, store, distribute and transport fuel. With our vast knowledge and experience we can address unique and specific needs of your project.

systems for Jet A1 and JP8 aviation fuel. Highly trained and experienced personnel are fully conversant with working in these environments with HSE procedures that fully comply with International Standards and Regulations.

The Company is focused on providing specialised petroleum engineering services superior to the industry norm in methodology, standards and performance.

Limited offers a full spectrum of professional engineering and consulting services in relation to aviation fuel storage and the transportation of aviation fuel.

We also provide engineering and design services for fuel receiving storage and distribution systems for transportation-related fuel handling facility and systems

One Stop Shop Solutions

...

PMC Engineering (Private) Limited is an Aviation Fuel Storage and Fuel Systems Solutions Provider.

Our technical and management expertise allows us to serve as an extension of our clients' engineering and management staffs. Through hundreds of fuel-related projects, our engineers and other professionals bring specialised expertise to each client's objectives

Although we are specialised, the Company offers a comprehensive list of professional engineering services and provides a proactive approach to project management. This proactive approach ensures that our clients get the maximum benefit of programming, planning, design, construction follow-on and management services for their petroleum projects from a single source.

An Aviation Fuel Storage & Fuel Systems Solutions Provider

PMC Engineering (Private) Limited, has been founded to provide specialised petroleum engineering services superior to the industry norm in methodology, standards and performance.

We are exclusively focused on the Planning, Design, Construction, Management and Commissioning of complex aircraft fuel receiving, storage and distribution facilities

We are a specialised consulting engineering firm. We design complex aviation fueling systems and our clients are airlines, airports and

airport fuel servicing companies.

We along with our associate partners specialise in providing cost effective, fast track solutions to the Military. PMC Engineering (Private) Limited have design teams who can provide multi product delivery methods.

PMC Engineering (Private) Limited and our associates & partners can design and manufacture bespoke refueling systems for all types of fluid handling and refueling applications, both offshore and at remote land-based facilities.

We can provide specialist Engineering Consultancy Services for the design and development of General Aviation fuel storage facilities at small or remote airfields. The systems we can provide include mobile trailer bowzers, airfield refueling sets and bulk fuel transportation, as well as offshore and marine helicopter refuellers.

PMC Engineering (Private) Limited offers a full spectrum of professional engineering and consulting services for aviation and transportation fueling facilities
